Honourable Prime Minister,

Let me express my concern regarding one of the world's worst industrial disasters that happened in Bhopal thirty years ago. The impact of the disaster on the human rights of the local population has been devastating.

I was encouraged to hear that your Government recently told Bhopal survivors it will revise its estimate of the number of deaths and injuries in the compensation case against the companies.

I urge you to honour this positive commitment, and furthermore to take the following actions:

- Initiate a full environmental clean-up of the former UCIL factory site and provide medical assistance for those affected;
- Hold the companies involved to account by ensuring that they pay adequate compensation to victims of the gas leak, comply with outstanding criminal proceedings, and cover the costs of the clean-up operation.

Thank you for your attention regarding this important case.

With kind regards,
